Soil Preparation Vegetables & Flowers

(100 sq. ft. area, 10' x 10')

Premium Preparation

- 3 to 6 Bags of Bumper Crop (2 cu. ft.)
- 8 lbs. of Garden-tone, Plant-tone or Flower-tone
 (Apply again in 6 weeks. Purchase 18 lb. bag for best value)
- 2.75 lbs. of Poultry Manure
- 5 lbs. of Hydrated Lime
- 20 lbs. of Gypsum*

Spread the above ingredients evenly over the entire area.
 Turn the soil over to the full depth of the spade and smooth with a rake.

Mulch, black plastic, landscape fabric, straw, etc. will prevent weeds, warm the soil, and reduce watering needs. (Install black or landscape fabric prior to planting-apply straw after planting).

Apply the above fertilizer every 4-6 weeks (and hydrated lime at 1/2 the rate to tomatoes) during the growing season.

* Gypsum minimizes salt water damage and improves compact soils and helps prevent blossom end rot on tomatoes.
